

AAROHAN

Ascent of Knowledge

- **Who all are eligible for the exam?**

Students of classes 9-10 and 11-12 (Science with Mathematics), studying in school affiliated with any board are eligible to appear in the exam.
- **When is the exam conducted?**

The exam is scheduled to be conducted in two slots. Slot 1 is from 21-26 October 2018 and Slot 2 is from 15-22 November 2018. The school can select any slot and one date from the selected slot as per their convenience to conduct the exam. It is mandatory that all the students registered from a school can appear in exam only on the date selected by the school.
- **What is the exam pattern?**

The exam focuses on enriching the application skill set of the students, rather than testing the memory. A set of passages with a unifying scientific phenomenon is provided, based on which MCQs are given. For sample papers, visit our website www.bits-apogee.org/aarohan-2019.
- **How credible is the paper, since it's designed by a student body?**

The paper made by the organizing committee would be proof read by a panel of Professors and the credibility of the paper is unquestionable.
- **What would the students gain?**

The paper aims to inculcate scientific temperament and evoke the curiosity of a student. It requires no preparation- is completely IQ based. Regional winners get loads of goodies among other benefits and the national winners get to visit BITS Pilani during APOGEE-our international annual technical festival, with all events expenses taken care of.
- **What is the registration process?**

Once the school is on-board with AAROHAN, an online registration sheet will be sent to the school via e-mail. The school is required to fill in the details of the students interested to appear in the exam in the registration sheet and e-mail us back the sheet with all the details of students filled-in along with the payment of the registration fee in 10 days' time. The last date to register for October slot is 12 October 2018 and for the November slot is 2 November 2018. Students can also register individually through our website once the school has confirmed the date of conduction of exam.
- **What is the exam/registration fee?**

The exam fee is Rs 150 per student, to be paid online on our website or through demand draft drawn in favour of BITS Pilani.
- **How is this different from other Olympiads?**

The examination, unlike many others, doesn't stress on solving more problems in less time, but focuses more on helping increase the intellect and the problem-solving ability of the student.
- **What is all required from the school for conducting the exam?**

The school must provide us with the basic infrastructure and invigilators for conducting the exam. Also, the list of students and the registration fees is required.
